

**Notes from meeting of the
EDUCAUSE State Systems Constituent Group
Tuesday, October 30, 2001 — Indianapolis
Leader: Warren Wilson, South Dakota Board of Regents**

There were 23 of us who signed the attendance list at the Tuesday, Oct. 30, lunch meeting of the State System Forum. I appreciated all of the discussion and sharing of information as shown by the number of conversations that continued after we officially ended the meeting. Again, I encourage you to join the listerv which is accessible from <http://www.educause.edu/memdir/cg/cg.html>.

There was wide ranging discussions on various issues. The roundtable of self introductions brought up many of these issues which were followed by more detailed conversations. In no particular order, the issues I had down were:

- * state-wide network services
- * 24 X 7 Help Desk availability
- * Content sharing/learning collaborations
- * Directory services authentication
- * e-business guidelines
- * Groupware applications (i.e. e-mail)
- * policies related to privacy and security
- * library services collaborations

I hope to "see" you on the listserv soon.

Warren Wilson
South Dakota Board of Regents
