The CERT Coordination Center (CERT/CC) is a center of Internet security expertise located at the Software Engineering Institute, <<http://www.sei.cmu.edu/>>, a federally funded research and development center operated by Carnegie Mellon University. Information ranges from protecting your system against potential problems to reacting to current problems to predicting future problems. Their work involves handling computer security incidents and vulnerabilities, publishing security alerts, researching long-term changes in networked systems, and developing information and training to help you improve security at your site.
