Index

A

Academic legacy systems, 115
Academic polices, 64–65
Access to institutional technology,
141–142
Acquisition of information resources,
143–145
Activities: institutional, 30; involving
e-business, 42–44
Administrative legacy systems, 115
Administrators, in higher education,
28
Admissions applications, 72
Admissions offices, role of, 50
Advertising, 35, 65, 82, 121
Advertising-based e-businesses, 56
Advising tools, 59
Affiliate model, 83
Alternative portal strategies, 99–103
Alumni offices, 51
Applicants, influence of Web sites
on, 8
Application cameos, 39
Applications. *See* Software
Application vendors, 101
Assets, physical/knowledge, 46–47
Assumptions, about policy frame-
works, 147
Auctions, 56, 80–81
Audience page links, 96

Audience pages, 94
Audited call director functionality, 57
Authentication, 19, 36, 64
Authority policies, 149–150
Authorization, 19–20, 64
Automated services, 10
Automatic call distribution (ACD),
25

B

Back-end data system vendors,
100–101
Bargain discounters, 83
Benchmarks for CRM strategy,
30–32
Benefits of Horizontal Enterprise Por-
tals (HEPs), 112–114
Best practices for portal development,
114–116
Book sales, 54–55
Boston College, 87–88, 92
Brand names, 87. *See also* Trademarks
Browsers, 88–89
Business models, 82–83
Business opportunities, 156–157
Business practice, changes in,
11–12
Business strategies. *See* Customer rela-
tionship management (CRM);
Strategies

Business-to-business/business-to-customer services, 21

Business-to-customer models, 56

C

Cameos, 39–40

Campaign management, 26–27

Career-oriented education, 44

Case management systems, 57

Catalogs, on-line, 53

Certification processes, 46, 63–64

Challenges, 22

Change management, 132–136, 140, 161

Channels, 38–40

Co-creation of goods and services, 52

Cohen, Michael, 131, 132

Collaboration, 52, 102, 108

Collaboratives, 12

CollegeClub, 76

College Opportunities On-Line (COOL), 78

Colleges. *See* Institutions

Commercial portals, 51

Commercial sector, 2–3

Common portal reference framework (uPortal), 97–99

Communication systems, 57

Communities: building, 41–42; community-building tools, 22; institutions as, 8–9; university, 17

Community sourcing, 119

Competitiveness, 45–56, 60–61

Confidential information, 144

Conflict management, 62–65

Constituents, 56–57, 94, 95

Content views of institutional Web sites, 93

Corporate universities, 44

Cost reduction, 70, 71, 72–74; collaboratives, 102; tuition, 79; using auctions for, 81

Costs: of portals, 116; search capabilities, 77

Course management vendors, 101

Course materials: ownership of,

51–52; pirating of, 146; syndication of, 47, 48, 49

Course portals, 40

CPAD (customized, personalized, adaptive desktop), 36–38

Current issues, 128–132. *See also* Trends and issues

Customer-centered model of Web services, 15

Customer-centered resources, 16

Customer-centric aspect of portal strategies, 5

Customer relationship management (CRM), 8, 24–25, 25–26

Customers, 17–18; focus on, 23; needs of, 50; and providers, collaboration with, 52

Customer services, 21–22, 31

Customization of portal pages, 36–38, 38–39. *See also* Personalization of portals

Cyert, Richard, 131

D

DABS (Defense Automated Bidders Service), 71–72

Data administration/management, 64

Data cameos, 39

Definitions of key terms for policy issues, 149–150

Delivery of services. *See* Service delivery

Design/development of products, 51–52

Design option examples, 119–120

Development: of e-business, 54; of electronic information policy framework, 140–147; of portals, 114–116, 122–123

Digital certificates, 150

Digital identities, 141–142

Disaster protection, 150–151

Distance education, 48–49, 79

Distributed Learning Network, 48

Dutch auctions, 80

Dynamic pricing, 79, 81

E

E-books, 49
 E-business: activities of, 42–44; CRM applications for, 26; effects of, 42; implementation of, 52–58; marketing, 143–144; opportunities for, 156–157; pressures on universities regarding, 44–52; revenue alternatives, 80; service models, 55–58; vendors, 45, 70
 E-commerce, 121
 Education companies, 44
 Education delivery, 60–61
 EDUCAUSE Advisory Group on Administrative Information Systems and Services, 3
 EduCommerce, 82
 Electronic admissions applications, 72
 Electronic data interchange (EDI), 71
 Eliminating paper, 71–72
 E-mail, 57, 151
 English auctions, 80
 Enrollment, mailing campaigns, 27
 Enterprise application integration, 53
 Enterprise portals, 111
 Enterprise resource planning (ERP), 6, 9, 23, 100
 E-pricing models, 79–80
 E-procurement, eliminating paper with, 71–72
 E-tailing, 143–144
 Ethical issues, 12
 Executive management, 103–104, 114–116, 120

F

Faculty members, 28–29, 114
 Family Educational Rights and Privacy Act of 1974 (FERPA), 62
 For-profit education companies, 44
 Fundraising, 26–27, 29, 119

G

Georgetown University, 81
 Goods and services, joint creation of, 52

H

Hierarchical structure of service units, 46
 Higher education: CRM strategies for, 25–26; current trends, 128–132; example of CRM in, 26–27; impact of CRM on, 27–30; in the nineties, 125–128; portal vendors in, 118
 Home pages versus portals, 34
 Horizontal Enterprise Portals (HEPs), 34–36, 37, 110, 111
 Horizontal integration, 45
 Hosted portal sites, 99–100
 Human resources (HR), management of functions of, 46
 Hypertext links, 39

I

Identification: PINs, 95; single network IDs, 19
 Identity, consolidation of, 20
 Independent distribution points, 47
 Infomediaries, 57, 74–77
 Information: access and security issues, 148–150; access to specific, 39; acquisition/retention/disposition of resources, 143–145; appropriate use of, 139; collection of, 57; disaster protection for, 150–151; organization-specific, 36; ownership of, 145–147
 Information delivery, 6
 Information resources: access to, 141–142; acquisition/retention/disposition of, 143–145; disposition of, 143–145
 Information technology (IT), 60, 104–107; initiatives, 5
In loco parentis role, 13
 Innovations, benefits of, 6
 Institutional information portals, 87, 88, 90–97, 103
 Institutional issues, of leadership, 104–107
 Institutional pages, 93
 Institutional policies, changes to, 12

Institutional technology, 141–142
 Institutions: as communities, 8; customer access to, 30; smaller, 100; use of names of, 141, 142–143
 Integrated policy frameworks, 147–153
 Integration of services, 53, 106
 Intellectual property rights, 62, 122, 145–147, 151–153. *See also* Course materials
 Interaction versus passivity, 61
 Internal services, integration of, 53
 Internet-based relationships, 17–18
 Internet service groups, responsibilities of, 106–107
 Issues. *See* Trends and issues

J

Jacobsen, Carl, 54
 Java, 3
 Java in Administration Special Interest Group (JA-SIG), 89, 97, 102, 118
 Jenzabar, 100–101
 Joint creation of goods and services, 52

K

Knowledge-based products versus physical assets, 46–50
 Knowledge management, 113

L

Leadership issues for information technology (IT), 104–107
 Learning, Web-linked, 42
 Legal issues: access to institutional information, 142; information resources and, 152; intellectual property rights, 62, 122, 145–147, 151–153; ownership of information, 121, 145; privacy, 12, 62, 121; risk/conflict management, 62; Web content, 143; work-for-hire, 152–153. *See also* Policy issues
 Lessons: for change management,

132–136; of the nineties, 125–128
 License fees, 116
 Lightweight directory access protocol (LDAP), 95
 Links. *See* Hypertext links
 Logical security, 148–149
 Log-in standards, 95, 115

M

Mailing campaigns, 27
 Managerial security, 149
 March, James, 131, 132
 Marketing, 26–27
 Mass production to mass personalization, 6–7
 Megaportals (Horizontal Enterprise Portals), 34–35, 110
 Metaphors, 5, 9–10
 Mock-up of institutional information portal, 91–92

N

NACUBO (National Association of College and University Business Officers), 3
 National Center for Education Statistics, 78
 Networked delivery of courses, 145
 Network model, 6
 New Economy, 162

O

Ohio Learning Network, 79
 On-line communities, 8–9
 Open-cry auctions, 80
 Operating efficiencies, 71–79
 Operating principles, 147–148
 Operating systems, 38
 Organizational issues, 65–66
 Outsourcing, 45–46
 Ownership of information, 121, 145

P

Paper, eliminating, 71–72
 Partnerships, 53
 Partnership with universities, 47

- Pay-for-attention model, 83
 - Personal identification numbers (PINs), 95
 - Personalization of portals, 20, 35
 - Personal pages, 93
 - Personal portals, 94–97
 - Personnel issues, 66
 - Person registries, 20
 - Physical assets versus knowledge-based products, 46–50
 - Physical auctions, 80
 - Physical security, 149
 - Pitfalls, 122–123
 - Policy issues: academic, 64–65; areas to address, 62–63; complexities of, 160–161; integrated frameworks, elements of, 147–153; need for framework, 140–147; protection of rights/privacy/ownership, 139–140; questions to consider, 120–122. *See also* Legal issues
 - Portal initiatives, 4
 - Portal metaphor, 1, 5, 9
 - Portals: alternative strategies, 99–103; benefits of, 112–114; commercial, 51; in context, 155–156; customer-centric aspect of strategies, 5; definition of, 109–110; effects of, on colleges/universities, 4–5; elements of good, 37–38, 117; evolution of, 6; future technology, 11–13, 22, 40; getting started, 114–116; institutional information, 87–88; iterative building of, 115; policy issues, 120–122; predictions of future number of, 109; provider options, 117–120; reasons for having, 111–113; as relationship managers, 20; routes to development of, 122–123; selling importance of, 103–104; software supported by, 116; types of, 34–35, 82–83, 110–111, 159; vendors/costs of, 99–100, 116
 - Price comparisons, 77–79
 - Pricing policies, 58, 65, 79, 81
 - Privacy issues, 12, 62, 121
 - Private sector, 44, 45, 46
 - Privileged information, 144–145
 - Product research, 77
 - Profiles of students, 144
 - Proprietary information, 144
 - Providers, and customers, collaboration with, 52
 - Public institutional Web sites, 92–94
 - Public Web sites, 92–94
 - Publishing Web sites, 49
- R**
- Rebuilding value/supply chains, 58–60
 - Recommender system sites, 83
 - Relationship management, 20–21
 - Relationships: with alumni, 50; constituency, 56–57; Internet-based, 17–18; portals as means of establishing, 113; with stakeholders, 158
 - Requests for Proposals (RFPs), 71–72
 - Research: delivery of education/conduct of, 60–61; price comparisons, 77–79; Web-based tools for, 59
 - Responsibilities, policies for, 149
 - Retention of information resources, 143–145
 - Return on investment (ROI), of implementing CRM strategy, 30–32
 - Revenues: advertising strategies, 82; auctions, 80–81; business models, 82–83; distribution of, 65, 80; e-pricing models, 79–80; generation of, 116
 - Reverse auctions, 80, 81
 - Rights, of staff members, 142
 - Risk management, 62–65
 - Role-based access metaphor, 9–10
- S**
- Schein, Edgar, 132
 - Search capabilities, 38, 39, 77
 - Secure servers: access to, 95; audience page links to, 96; portal requirements for, 91

- Security issues, 11, 121; authentication, 19; authorization, 19–20; digital certificates, 150; digital identities, 141–142; disaster protection, 150–151; policies related to, 148–150; universal IDs, 19
- Self-certification, 46
- Self-service, 9–10, 28
- Service delivery, 157–158; and e-business, 41; education, 60–61; on-line versus face-to-face, 74; realigning, 42; reducing cost of, 72–74; strategies for, 61–62
- Service models, 55–58
- Services: faculty to student, 29; and goods, joint creation of, 52; integration of internal, 53; offered through portals, 21–22
- Service units, 46
- Shadow systems, 64. *See also* Privacy issues
- Shopping bots, 78
- Sign-on design, 115
- Silo structure of service units, 46
- Smart Force, 76
- SMARTHINKING, 59
- Software: automatic call distribution (ACD), 25; constituency relationship management, 56; CRM, 23, 24–25; development of Web applications, 96–97; licensing issues, 152; management of licensed, 145; portalware, 33; vendors, 34
- Specialized portals, 82–83
- Staff members, benefits of portals to, 114
